I T A L Y

In 1971 **OPTIKA** was founded by a physics teacher with great capabilities in combining design skills with teaching sensitivity. In 1990's the second generation started to manufacture microscopes. The company is growing fast, passing from few employees to more than 60.

A team of physicists, chemists, biologists and scientists work to meet market demands by designing and producing durable, user-friendly scientific lab equipment.

Nowadays **OPTIKA** is a leading manufacturer and supplier of scientific instruments for educational, laboratory, industrial and medical use. Our mission is driven by the desire to exceed customers' expectations and provide our selected distribution network with valuable products.

# Legend

-  **Electromagnetic Force Restoration.** Coil in a permanent magnet for the the most accurate weighings
-  **High Resolution Load Cell.** Strain gauge measure the deformation as change in electrical resistance
-  **RS232 Data Interface.** To connect the balance to printer, PC, peripheral devices.
-  **Measuring Units.** Select the measuring unit that balance will use to display weight
-  **Piececounting.** Function to count identical items, reference quantities are selectable.
-  **Checkweighing.** Upper and lower limits can be set individually, for dosing and portioning.
-  **Percentual Weighing.** Function calculates the variation of a sample from reference value (100%)
-  **Totalization Function.** Measures cumulative weight of multiple items. Shows total and current weight
-  **Animal Weighing.** Accurate readings under unstable conditions such moving laboratory animals.
-  **Density Determination.** This function accurately determines density of a solid object or a liquid
-  **Max Load (Peak hold).** This function retains the peak value in a series of consecutive weights
-  **GlP Setup.** Allows storing identification data of balance, project and user. Date and Time
-  **Date & Time.** Balance shows current date and time
-  **Multi Language.** Several languages can be selected from the menu of the balance
-  **Formulation.** Allows setting recipes with name and tolerances for each ingredient. Automatic reportioning
-  **Suspended Weighing.** A support with hook can be loaded on the underside of the balance
-  **Initial verification.** According to 2014/31/EU available for balance with EC/(OIML) Type approval
-  **Accumulator.** Balance has internal accumulator or can be used with optional external accumulator
-  **Battery Operating.** Balance can work using AA batteries
-  **Statistics Function.** Shows Min, Max, Sum, Average, Standard deviation
-  **Gross-Net-Tare.** Function shows simultaneously gross, net weight and tare.
-  **Database.** Internal database to store data and drying methods
-  **Textile Function.** Determines the title of a thread, measuring units: Tex, Td, Nm, Nc.
-  **Drying Modes:** different temperature profiles are available for drying process
-  **Infrared Sensors.** Touchless, to call TARE or PRINT functions without touching the balance
-  **Touchscreen Display.** 5 inch resistive display, user friendly, easy to use and intuitive.
-  **LCD Display.** Standard 8 digit LCD display with backlight
-  **Graphic Display** Text/graphical LCD dot matrix display with backlight.
-  **Ioniser.** Integrated ioniser on the back of the balances
-  **Bluetooth.** It is possible to connect bluetooth devices
-  **USB interface.** It is possible to connect a usb pendrive
-  **Graph.** Real time drying process graph visualization
-  **Password.** User profile can be password protected
-  **Memory.** It is possible to store up to 5 different drying programs

TS semi-micro balances are the top level, most innovative and advanced series by OPTIKA. Equipped with large 5" color touch screen display, it gives an user-friendly access to all the balance's advanced applications and internal databases. The user has easy and intuitive access to all the functions thanks to the icon-driven menus. This means more efficiency, productivity and interactivity. The TSI models are equipped with an integrated ioniser on the back of the balance with the purpose to neutralize static electricity on charged samples like plastic parts, containers or films for acquiring the most accurate results. A double case structure protects the heart of the balance: an aluminum inner case and a composite plastic external case. The many on-board functions already included, up to 6 operating languages, the large 5" inch display and the RS232 serial output close the circle of a complete product, reliable and truly convenient.

### Features

- Electromagnetic force restoration weighing system
- Highly integrated weighing cell
- Automatic internal calibration
- 5" Touch-screen Display 800x480
- RS232 serial interface
- Selectable Measuring units
- Internal Database
- GLP
- Multi Languages (EN-DE-FR-IT-SP-PT)
- Multi-user with password protection
- USB port for import/export database data
- Advanced piececounting function with Statistics report
- Textile function to measure fibers with Statistics report
- Advanced Density function, with density index (DI) calculation
- Formulation (Recipe)
- Checkweighing
- Percentual weighing
- Weights adding
- Animal weighing
- Max load determination (Peak hold)
- Large glass draught shield with 3 sliding doors for easy access to the items being weighed.

Optional Ioniser model ION-A15

The OPTIKA series of SemiMicro SM balances is equipped with the new highly integrated electromagnetic cell, with automatic internal calibration on all models, they are characterized by a high level of precision and repeatability.

As in the tradition of OPTIKA products, SemiMicro SM balances deliver an excellent performance/price ratio.

### I-Model

I-models equipped with integrated ioniser on the back of the balance. The ioniser has two way of operating: 2 minutes or continuously for max 8 hours.

### Features

- Electromagnetic force restoration weighing system
- Highly integrated weighing cell
- Automatic internal calibration
- Efficient filtering to deliver quick and accurate results
- LCD with backlight with adjustable contrast
- Large glass draught shield with 3 sliding doors for easy access to the items being weighed
- Plastic protection cover for keypad

### Features

- Electromagnetic force restoration weighing system
- Highly integrated weighing cell
- Recipe database: 99 recipes can be stored, each with up to 20 ingredients
- Large Graphic display allows efficient and easy operations
- Multilanguage: EN-DE-FR-IT-ES-PT
- GLP/ISO record keeping of weight values with date, time and serial number
- Large glass draught shield with 3 sliding doors for easy access to the items being weighed
- Plastic protection cover

### Ioniser Technical data

- Operation modes: 2 minutes or continuous for max 8 hours
- Ozone concentration: 0-0.05 ppm (2cm from ion source)
- Distance sample-ion source: about 5-40 cm
- Discharge time: 9s/5cm, 13s/10cm
- Ambient conditions: 0-50°C, 20-80% air humidity (non-condensing)
- Ioniser Power supply: IN AC 100-240V 50/60Hz, OUT DC 12V, 500mA

Optional Ioniser model ION-A15

A series family includes Analytical Balances that reach the highest measuring performance. They are equipped with a highly integrated weighing cell whose benefits are high stability against temperature changes and time, quick response thanks to reduced mass and overall reduction of total number of components. A balances have -as standard- automatic internal calibration that allows always precise measurements, practically independent from environment temperature changes. All models are equipped with backlit LCD display, a glass draft windshield that protects a large volume inner measuring chamber. Each balance is equipped with RS232 output interface.

### Features

- Electromagnetic force restoration weighing system
- External or automatic internal calibration
- LCD with backlight with adjustable contrast
- Large glass draught shield with 3 sliding doors for easy access to the items being weighed
- Plastic protection cover
- Under hook weighing <sup>(1)</sup>

### Optional functions

Paper Grammage Function (CNS219)

Double case structure, ergonomic keypad. CG balances have an extensive recipe database and many embedded advanced features make them perfect for use in laboratory, research departments, formulation and quality control applications.

### Features

- Electromagnetic force restoration weighing system
- External or automatic internal calibration
- Recipe database: 99 recipes can be stored, each with up to 20 ingredients
- Large Graphic display allows efficient and easy operations
- Multilanguage: EN-DE-FR-IT-ES-PT
- GLP/ISO record keeping of weight values with date, time and serial number
- Round glass windshield
- Plastic protection cover
- Under hook weighing <sup>(1)</sup>

TG - Series balances are moisture balances with large 5" color touchscreen display that gives a user-friendly access to all the balance advanced applications and internal databases. The user has easy and intuitive access with fast programming of drying cycles, thanks to icon-driven menus. This means more efficiency, productivity and interactivity. A double case structure protects the heart of the balance: an aluminum inner case and a composite plastic external case. The many on-board functions already included, the possibility of calibrating the internal thermometer using the optional KIT, up to 6 operating languages, the large 5" inch display and the RS232 serial output close the circle of a complete product, reliable and truly convenient. The models in the family allow reaching up to 0,001% drying resolution.

## Features

- Electromagnetic force restoration weighing system (A64M and 163M)
- High resolution load cell weighing system (163L and 62L)
- Halogen-infrared lamp
- External calibration
- Large 5" color touchscreen 800x480 display
- RS232 serial interface
- Drying resolution 0,001% (-A64M), 0,01% (-163M and -163L), 0,1% (-62L)
- Drying modes: Time mode (1-99 min.), Autostop % or absolute autostop in grams, Manual
- Live Graph of humidity content changing
- Temperature range: 35-160°C, step of 1°C
- Temperature Profiles: Standard, fast, mild, steps
- Results in: Humidity%, Dry residue%, ATRO%, Weight
- Test results complete of full drying cycle Graph
- Up to 10 hot keys for fast recall of drying cycles from internal database
- Default database stored already with more than 30 products
- Saving results with test reports and drying graphic up to 300 records, for each user.
- Customizable settings for up to 10 users with the possibility of password protection.
- Serial output for connection to printer, USB port for export or import database, test results, etc.

**NEW****T GRAPHIC SERIES - Resolution 0,0001g-0,001g-0,01g**

The new T GRAPHIC - Series are rugged instruments for moisture determination of raw materials and finished samples in the food, cosmetics, ceramics, agriculture and construction industry.

The Dot Matrix graphical display with backlite makes much easier and friendly using the instrument and gives easy and intuitive guidance through the operating process thanks also to his advanced software. On the display are shown all the parameters regarding the drying process and all the relative results, all viewable at once.

This instrument brings features such as one key pressing for starting automatically the last drying cycle memorized or the default one, possibility to print the drying session by interval time set by the user, automatic session starting just by closing the heater etc...

Drying readability are 0,001%, 0,01% and 0,1%. Possibility of calibrating the internal thermometer (with optional KIT CNS02).

The JW family of balances was designed for use in jewelry applications. This family includes the Carat Series with high precision and the Gold Series for higher capacity weighing of precious metals. JW balances are all provided with RS232 connectivity; **0.1mg and 1mg models are equipped with a large protection draftshield.**

### Features

- Electromagnetic force restoration weighing system
- External or automatic internal calibration
- g/ct swapping button on keypad
- Glass draught shield with 3 sliding doors for easy access to the items being weighed
- 0,01 resolution models are not provided with glass draught shield
- Plastic protection cover

Optional Ioniser model ION-A15

# TS-iDens - Balance for Density Index

TS-iDens is a Balance for density calculation, in particular it is designed to easily determine the Density Index of a solid sample without need of any computer software or external database.

## All-in-one product

With TS-iDens, calculating the density index is easy and fast. Without the necessity to connect the balance to computer for using a specific software, all the data and results can be seen directly in the large screen of the balance, with the possibility to print also all the data with an optional printer.

## The strenght of technology

TS-iDens is derived from the sophisticated M5 balances family and therefore takes full advantage of all the strenghts of this series, that is, the large 5" color display, the touchscreen interface and the icon-driven menus, which make your work, respectively, intuitive, efficient and user-friendly.

## Database

As reference liquid for the density determination of the solid sample, the balance has already stored in the database the density values (at different temperatures) of distilled water or Ethanol so that one less thing for the user to care about; of course the user can use whatever other liquid as reference, provided its density value is known or calculated (thanks to the optional liquid density kit).

Density values of the reference liquid (distilled water or Ethanol) used during density determination of the solid sample are stored in the internal database. The user can choose another liquid as reference, provided its density value is known or he calculates (thanks to the optional liquid density kit).

### Automatic internal calibration

Model	Capacity (g)	Resolution (g)	Pan (mm)	Repeatability (g)	Linearity (g)	Response time (sec.)
TS-iDens	3100	0,01	80	0,01	± 0,02	≤ 2

### Technical data

- Span drift (+ 10...+ 30 °C): +/- 6ppm/°C
- Dimensions LxWxH (mm): 215 x 345 x 300
- Power supply 110-230Vac. 50/60Hz, output 24V 1A 13VA
- Net Weight: 7 / 8,5 Kg

## GLP

Internal Clock, date/time make work easier while GLP capability allow user to record Sample name, Project names and Balance ID, for traceability.

## Internal calibration

As standard feature this balance has internal automatic calibration, to ensure daily accurate measurements also during flow of time or conditions changing. User can also choose to switch to external calibration, using his calibration weight value.

## Multi-language and Multiuser

Choice of language among English, French, German, Italian, Spanish, Portuguese. protection of own settings, preferences and database is ensured by the multi-user structure with password protection. The user has easy and intuitive access to all the functions thanks to the icon-driven menus. This means more efficiency, productivity and interactivity. A double case structure protects the heart of the balance: an aluminum inner case and a composite plastic external case.

# TS-iDens - Balance for Density Index

## Density Index

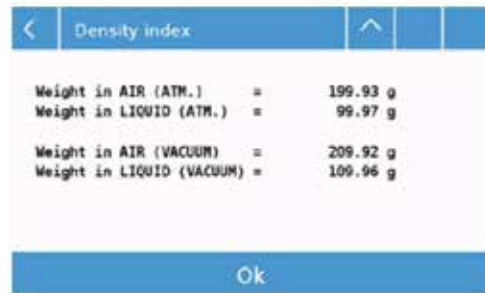

In foundries, especially for aluminium casting plants, the quality of molten metals is very important to assure the quality of the final cast product. In fact defects created during the melting stage (due to solid and gaseous impurities) could create problems to the final microstructure of the cast. Density index value of a metal sample is an index of how clean is the metal sample and how much free from pores that may have formed during the melting process. By measuring the density index (DI) of the metal, it is possible to control and optimize the process of production of the cast, improving the overall quality of final metal product, and thus drastically reducing rejection rate.

## Touchscreen interface screen shots

User can start a function or recall data from (internal) database.

Clear report of Density Index calculation is shown.

Instructions on the large display drive the user.

Easy and intuitive menu to insert data.

### Portable thermal printer DPP-250 (cable version)

DPP-250 and printer is a small footprint portable printer that can be used with OPTIKA laboratory balances. Weight values are printed quickly and sharply. The internal rechargeable battery grants mobility. Printer DPP-250 is supplied with connection cable to be connected directly to OPTIKA balances.

Type	Line Thermal printer
Print width	48mm (384dots/line)
Print speed	Up to 80mm/sec
Battery	Rechargeable battery (Li-Ion 7.4V, 1150mAh). Battery charge time: 2 hours. 20 000 lines with one charge
Paper roll	Width 57mm
External power supply unit (included)	AC 100 to 240 V, 50 to 60 Hz, DC 9 V/1 A
Interface	- RS232 for DPP-250
Operating temperature	5 - 40°C
Humidity	Max 85% relative (not condensing)
Dimensions	66 x 105 x 57h mm
Weight	295g (excl. paper roll)
Connection cable	Included for DPP-250

### Serial printer STAT

STAT printer is a thermal printer that can be used with OPTIKA laboratory balances. It can print weight values and, when requested, a full statistical analysis of the values including: number of values, mean values, sum, minimum, maximum, standard deviation, etc.. The printer can also record and print date/time and calibration details in compliance with GLP. Printer is supplied with connection cable to be connected directly to balances.

#### Features:

- Count and total of all measurements, Minimum, Maximum values, Range (Max-Min)
- Average value, Standard deviation
- GLP Record keeping of balance calibration with date/time print
- Available units: mg, g, Kg, pcs
- Languages: English, French, German

Type	Bidirectional RS-232 Thermal printer
Print speed	0,75 lines/sec ; 40/80 characters/line
Paper roll	Width 112mm, lenght 20m
External power supply unit (included)	230V 50Hz 0,12A / 9V DC 1,3A
Energy consumption (average)	min 0.5A (4W) - max 1.1A (9W)
Baud rate	1200-2400-4800-9600 Baud
Operating temperature	5 - 35°C
Humidity	Max 80% relative (not condensing)
Working life	5000 hours or 500000 lines
Dimensions	165 x 140 x 50 mm
Weight	450 g (excl. paper roll)
Connection cable	Included

### Line thermal dot printer TLP-50

TLP-50 printer is a compact printer that can be used with OPTIKA laboratory balances. This printer has internal clock so it can print date/time together with weight values. Paper type is label.

Type	Line thermal dot printing
Print width	54mm (432 dots)
Print resolution	203 x 203 dpi
Print speed	50mm/sec
Prints	Date/time
Paper type	Thermal paper rolls Label rolls
Paper roll	Width 58mm
External power supply unit (included)	AC 100-240 V, 50/60 Hz, DC 12V /2.5A
Interface	RS-232C
Operating temperature	5 - 40°C
Humidity	Max 85% relative (not condensing)
Dimensions	106 x 184 x 110h mm
Weight	950g (incl. power supply)

### Draft Shield rear panel with integrated ioniser

To neutralize static charges on samples to weigh. The user can easily and quickly mount this panel on a balance already in his possession, upgrading the balance with an integrated ioniser. The ioniser is easily activated by pressing a button. There are two ways of operating: 2 minutes or continuously for max 8 hours.

Suitable for following families:

- Semimicro 0,01 mg balances
- Analytical 0,1 mg balances
- CH and CGH 1 mg balances
- EH and EGH 1 mg balances

Includes:

rear panel with integrated ioniser, power supply.

## CNS0371

### Ioniser model ION-A15, for all balances

Static charges accumulate in many kind of samples that are being weighed during the laboratory routine. By blowing ions, the portable Ionizer ION-A15 neutralizes static electricity on charged samples like plastic parts, containers or films. Within seconds the sample is ready to be weighted free from static charges giving the operator accurate results.

The Ionizer ION-A15 is small and light, easy to transport and use everywhere in the laboratory.

Distance sample-ion source	about 5-40 cm
Discharge time	9s/5cm, 13s/10cm, 100s/40cm (with fan turned on)
Ozone concentration	0-0.05 ppm (2cm from ion source)
Maximum air volume	0.06 cm <sup>3</sup> /min
Ambient conditions	0-50°C, 20-80% air humidity (non-condensing)
AC adapter (primary)	AC 100-240V, 50/60Hz
Dimensions	11 x 10,5 x 4,5 cm
Weight	310 g
Installation site	device may be only used indoors

### Thermometer calibration KIT

Small, fast-response thermometer for verify and calibrate the heating source of OPTIKA moisture Analyzers T Series & TG Series. A calibrated moisture analyzer's heater allows to have always accurate results. Essential for application where are required certified results.

Temperature range	40...+200°C
Resolution	1°C
Precision	+/-2°C
Diameter	Ø 46 mm
Indicator casing	AISI 304
Box Dimensions	200x210x60h mm; weight 260g

## CNS0476

### Communication KIT for balances

Complete kit to connect OPTIKA balances to a computer. It allows data collection, Statistics, creation of graphs and export results to Excel file.

The software included allows to perform all the functions of the balance from the PC such as Piececount, Density, Peak hold, Limits set etc...from your computer.

The Kit includes:

- RS232-to-USB converter
- Serial cable
- i-Weight Software for data collection and analysis

Operating systems: Windows 7, 8, 10 (32&64bit)

**NOT compatible with OPTIKA moisture analyzers.**

Input	9/12V
Output	5V 2100mA x 2 USB and 1xDC 9V/12V 2000mA
Battery charge time	5 hours
Battery duration	40 hours about (depends on use and on the device connected)
Charge status indication	By 4 LEDs
Capacity	10000mAh/37Wh
Dimensions	120x80x23mm
Weight	304g
